Figure 1 illustrates various map symbols and their corresponding text labels. The symbols are arranged in a grid-like fashion, with each symbol and its label presented in a separate box. The symbols include: Highway (solid line), Secondary Road (dashed line), Jeep Trail/Walkway/Path (dotted line), Railroad (line with cross-ticks), Pipe/Power Line (line with cross-ticks), Ridge/Physical Feature (line with small triangles), Property/Fence Line (line with small squares), Nonvisible Boundary (dashed line), Stream/Shoreline (blue wavy line), Intermittent Stream (blue dashed wavy line), River / Lake (blue solid wavy line), Glacier (blue wavy line with internal texture), Modality (text in a blue dotted box), Inset (text in a grey box with a border), and Out Area (text in a grey box with a border).

<sup>1</sup> A "•" following a place name indicates that the place is coextensive with a MCD. A "°" indicates that the place is also a false MCD; the false MCD name is not shown.

<sup>1</sup> A '\*' following a place name indicates that the place is coextensive with a MCD. A '°' indicates that the place is also a false MCD; the false MCD name is not shown.

<sup>2</sup> This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity but without numbers. A tribal census tract is a type of census

entity with no numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian hierarchy rather than by state and county. Where reservation or off-reservation trust lands cross state or county boundaries, the same tribal census tract number may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract entity.

<sup>3</sup> A \* \* \* following a block number indicates that the block number is repeated elsewhere in the block.
